Madki Sai Charan

saicharanaiml.edam@gmail.com +91 8660536409 LinkedIn GitHub Portfolio

Professional Summary

Computer Science undergraduate specializing in Artificial Intelligence & Machine Learning with hands-on experience in AI engineering, machine learning, software development, and intelligent automation. Skilled in Python, Java, SQL, React.js, and Flask, with practical experience building AI-driven applications and data-centric solutions. Strong foundation in DSA, OOP, and DBMS, complemented by conference research, technical projects, and student leadership.

Education

Institute of Aeronautical Engineering, Hyderabad *Sep 2023 – Present*
B.Tech in CSE (Artificial Intelligence & Machine Learning) CGPA: 9.10/10

Gauthami Junior College, Hyderabad *Jun 2021 – Aug 2023*
Intermediate CGPA: 10/10

Bhashyam High School, Hyderabad *Jun 2012 – May 2021*
SSC CGPA: 10/10

Technical Skills

Programming Languages: Python, Java, SQL
Databases: MySQL
AI & Machine Learning: Prompt Engineering, Predictive Analytics, Recommendation Systems
Web Development: HTML, CSS, JavaScript, React.js, Flask
Automation & Integrations: n8n, Workflow Automation, Gmail API, Google Sheets, OAuth 2.0
Developer Tools: Git, GitHub
Core Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS

Internships / Experience

Institute of Aeronautical Engineering, Hyderabad
Summer Research Intern (SRI 2026) *Mar 2026 – Present*

- Developed IntelliAttend, a multi-agent attendance automation framework using RelayOS for attendance monitoring, workflow orchestration, shortage detection, and automated notifications.
- Applied workflow automation and adaptive notification mechanisms to streamline attendance-related processes and contributed to technical documentation and publication-oriented development.

Cubixso Solutions Pvt Ltd, India
AI Engineer Intern *Jan 2026 – Jul 2026*

- Developed AI-assisted responsive web applications using React.js for client projects, contributing to improved frontend performance and user experience and achieving a reported **30%** increase in client satisfaction.
- Evaluated and documented AI productivity tools for software development workflows, supporting improved development efficiency and technology adoption.

Diamond Association Bangalore, India
Frontend Developer Intern *May 2025 – Jun 2025*

- Developed and redesigned responsive business web interfaces using React.js in collaboration with industry professionals, contributing to a reported **40%** improvement in user engagement.
- Optimized frontend rendering, responsiveness, and interface design to improve usability and reduce page-loading overhead.

Foundations of AI Internship, AICTE & Microsoft (Virtual)
AI & ML Intern *Apr 2025 – May 2025*

- Developed an employee performance prediction model using Python and machine learning techniques, achieving **85%** prediction accuracy for HR analytics.
- Performed data preprocessing, model training, and evaluation to develop a predictive solution for employee performance analysis.

Cognifyz Technologies (Virtual)
Java Development Intern *Feb 2025 – Mar 2025*

- Applied Core Java, Object-Oriented Programming, data handling, and problem-solving concepts to complete application development tasks and technical assignments.

Projects

PraveshPath: AI-Based Engineering Branch Prediction System *Jun 2025 – Jun 2026*

- Developed a hybrid rule-based and machine learning framework to predict suitable engineering branches based on students' academic profiles and admission-related factors.
- Implemented predictive analytics and recommendation mechanisms, achieving **95%** model accuracy for engineering branch allocation and admission decision support.

EduNotify AI: Intelligent Student Communication and Email Automation System *May 2026 - Jun 2026*

- Designed an automated communication platform using n8n, Gmail API, OAuth 2.0, and Google Sheets to streamline large-scale academic notifications.
- Developed secure API integrations, dynamic HTML email templates, and scalable notification workflows for automated institutional communication.

IntelliAttend: Multi-Agent Attendance Automation System *Dec 2025 – Mar 2026*

- Developed a multi-agent attendance automation framework for dataset validation, attendance shortage detection, personalized notification generation, and workflow monitoring.
- Implemented adaptive dynamic templates, condition-based filtering, and multi-channel communication through WhatsApp and Email, achieving **88.9%** workflow completion across 27 automated executions with retry-based delivery tracking.

CareerSense AI: Hybrid Intelligence Engine for Career Path Discovery *Aug 2025 - Nov 2025*

- Developed an AI-based career recommendation system that analyzes user skills, interests, and academic performance to generate personalized career path suggestions.
- Implemented predictive analytics and recommendation mechanisms, achieving **92%** prediction accuracy for personalized career path discovery.

Employee Performance Prediction Using HR Data *Apr 2025 – May 2025*

- Developed a machine learning-based workforce analytics system to predict employee performance ratings using HR data.
- Applied data preprocessing, feature analysis, and predictive modeling techniques, achieving **85%** prediction accuracy for employee performance analysis.

Research & Publications

A Hybrid Rule-Based and Ensemble Machine Learning Framework for Transparent College Admission and Branch Prediction

Presented at ICT4SD 2026 (Springer Nature) *Jul 2026*

- Proposed a hybrid rule-based and ensemble machine learning framework for transparent engineering branch prediction and admission decision support.
- Applied predictive analytics and policy-aware recommendation mechanisms to support transparent and data-driven admission decisions.

An Intelligent Multi-Agent Framework for Attendance Monitoring and Notification Using Adaptive Dynamic Templates

Presented at ICCET 2026 (IET Conference Proceedings) *Jul 2026*

- Designed a multi-agent framework for automated attendance monitoring, shortage detection, and personalized notification management.
- Developed adaptive dynamic templates and multi-channel communication workflows for automated attendance-related processes.

CareerSense AI: A Hybrid Intelligence Engine for Smart Career Path Discovery

Under Review (IEEE Conference) *Jul 2026*

- Proposed a hybrid intelligence framework for personalized career path discovery using user skills, interests, and academic performance.
- Applied machine learning and recommendation mechanisms to generate data-driven career path suggestions.

Achievements

Best Paper Presentation — ICCET 2026 *Jul 2026*
Academic Excellence Award 2026 — Institute of Aeronautical Engineering *Mar 2026*
Top Contribution Award 2025 — e-DAM *Jan 2025*
IELTS — Band 7.0 *May 2023*
Gold Medal — Level-1 NASO Examination *Mar 2020*
Srinivasa Ramanujan Award — Mathematics Olympiad *Dec 2017*

Certifications

Generative AI Essentials: Using LLMs to Work with Data — *IBM SkillsBuild* *Oct 2026*
AWS Cloud Foundations — *AWS Academy* *Nov 2025*
Artificial Intelligence Fundamentals — *IBM SkillsBuild* *Oct 2025*
Building LLMs using Prompt Engineering — *Nvidia* *Jul 2025*
Technical Training in Artificial Intelligence & Generative AI Learning Path — *Microsoft Learn* *May 2025*
Databricks Generative AI Fundamentals — *Databricks* *Apr 2025*
Prompt Engineering for Everyone — *IBM* *Apr 2025*
Introduction to Generative AI — *AWS* *Apr 2025*
Career Essentials in Generative AI — *Microsoft & LinkedIn* *Feb 2025*

Coding Profiles

LeetCode – 100+ Problems Solved, 2 Badges.
HackerRank – 50+ Problems Solved, 1 Badge.
GeeksforGeeks – 130+ Problems Solved.

Leadership

The Compendium
Senior Reporter and Head of Domain *Sep 2023 – Sep 2025*
- Led a team of 15+ student reporters covering technical and non-technical campus events, coordinating content collection, reporting, and timely publication across digital platforms.

e-Designing and Marketing
Content Writer and Head of Department *Jun 2024 – Apr 2025*
- Led technical content development and official documentation for college events and workshops, coordinating content creation and digital communication activities.

e-Designing and Marketing
Student Academic Mentor *Sep 2024 – Apr 2025*
- Mentored students in core subjects by simplifying technical concepts and providing academic and project guidance through structured mentoring sessions and workshops.

Street Cause IARE
Volunteer and Coordinator *Oct 2023 – Sep 2024*
- Coordinated community outreach initiatives, social drives, and fundraising activities supporting schools and orphanages while encouraging student participation and leadership.
